

ENVIRONMENTAL (GREEN) CRITERIA

No.	Requirement
1.	The Goods being procured are not included in the Product List; however, LTG shall independently determine environmental protection criteria relating to the subject of the procurement, applying this environmental principle at one, several or all stages of the product's life cycle: 4.4.4.5. the goods, once they have become waste, are suitable for preparation for reuse or recycling. The goods being procured are components and spare parts for electrical and electronic equipment, the metal and other material components of which, once the goods have become waste, may be sent for recycling or other use in accordance with the requirements of legislation governing waste management.
